

Anthony Wong

anthony_g_wong@brown.edu, 646-853-0612, [iscore101.github.io](https://github.com/iscore101)

EDUCATION

Brown University, Sc.B. Applied Math-Computer Science, A.B. Math; GPA: 4.0/4.0
Collegiate School: SAT: 1570; National Merit Scholar

Graduation: Dec 2025

Coursework: *Deep Learning, *Reinforcement Learning, *Optimization, *Math Stat., *Robust ML, *Applied Probability, AlphaGeometry, Real Analysis, Manifolds, Complex Analysis, Stoch Calc, Math ML, Abstract Alg, 'Stat, 'Lin Alg, Stats (TA)
(* denotes Graduate, ' denotes Honors)

EXPERIENCE

Quantitative Trader — Research Rotation - Citadel Securities New York, NY | Mar 2026 - Present

- Translating trader intuitions into alpha research by creating features, ML modelling, and robust backtesting

Quantitative Trading Intern - Citadel Securities New York, NY | June 2025 - Aug 2025

- Research-Driven Trading: Generated \$10 million strategy w/alpha feature extraction and forecast modelling research
- Index Options: Developed framework to systematically trade on vol surface relative to internal models (XGBoost, Ridge Regression, Transformers)
- Return Offer Received

Software Engineering Intern - Capital One Philadelphia, PA | June 2024 - Aug 2024

- Developed data analysis + visualization tool to automate risk detection, increasing coverage by over 10x
- ETL with mySQL queries on Snowflake and AWS RDS databases, optimized performance with Redis caching
- Implemented ESD tests, Bayesian change point detection, and ARIMA models on time series data to flag outlier records

Software Engineering Intern - Regeneron Tarrytown, NY | May 2023 - Aug 2023

- Built ETL pipelines with SQL, structuring data from data lake (AWS S3) to warehouse (Redshift)
- Detected and traced data inconsistency w/ Pyspark + Kafka in EMR; handled multimodal image and video data

COMPETITIONS AND AWARDS

- #231 / 4,000 — Putnam, Score: 40 (2x Top 500 Placement)
- #92 / 19,000 — AMC 12, Score: 135 (Distinguished Honor Roll)
- #215 / 6,400 — AIME, Score: 9 (3x Qualifier, 94% among qualifiers)
- #55 — US Chess, Peak ELO: 1970 (ranked top 100 for my age 2013-2022)

RESEARCH EXPERIENCE

Multi Agent RL Co-learning - Chanwoo Park, MIT Apr 2025 - Present

- Designing a learned, adaptive approach to curriculum design that replaces hand-crafted training curriculums
- Co-training a curriculum selection agent to target math model's capability frontier using rollouts and reward trends

Curriculum Distillation + World Model Finetuning - Randall Balestrieri Lab Sep 2025 - Present

- Created adaptive curriculum for vision foundation model distillation w/CKA-guided pass through teacher layers
- Paper submitted to Neurips 2026 under Prof. Balestrieri can be found [here](#)
- Applying RL fine-tuning (GRPO) and post-training techniques to amortize MPC on world models (DINO-WM, JEPA)

Large Language Models - LUNAR NLP Lab. Providence, RI | Feb 2025 - May 2025

- Experimented with mech interp (activation patching, linear probes, SAEs) for ICL reasoning tasks

Probability Theory - Brown Applied Math Dept. Providence, RI | Jan 2024 - May 2025

- Senior thesis on stochastic processes with Prof. Oanh Nguyen — real analysis, probability, and large deviation theory
- Research thesis can be found [here](#)

RL for Systems Optimization - Brown Database Group Providence, RI | Jan 2023 - Jan 2024

- Trained reinforcement learners (PPO, MuZero) to allocate compute in distributed data streaming

PROJECTS

Meta Hacker Cup

- Solved competitive programming algorithm puzzles; round 2 qualifier, finishing top 100 US in Rds. 1 & 2

Computational Biology Research - Cornell Weill

- Selected as Regeneron Science Talent Search (STS) Semifinalist

Research Agent w/ Hybrid Retrieval - Code

- Implemented autonomous research agent with a plan/decompose/tool-select/analyze/replan loop + fallback logic
- Built tool calling + trace reconstruction. Tested with synthetic reference data + benchmarks across agent capabilities
